n8n, AI workflow design, agentic workflows, Claude/OpenAI-style workflows, prompt design, API integrations, process/reporting automation

DevOps & Infrastructure

Linux, DNS, Cloudflare Pages/Workers/R2, AWS, Docker, Git/GitHub, CI/CD, static deployment, hosting migration, troubleshooting

Web, Data & Business Systems

Svelte, WordPress, CMS workflows, frontend/backend development, GA4, Search Console, Evidence.dev, DuckDB, documentation

Professional Experience

Haskins Information Technology LLC

Founder / Principal Consultant

St. Louis County, MO / Remote · Jan 2012 – 2026

- Built and operated an independent IT, web systems, automation, and consulting practice serving small businesses, agencies, local organizations, and community clients; now transitioning that experience into a full-time technical team role.
- Designed client-facing systems focused on reliability, simplicity, maintainability, and low-friction operations across web, infrastructure, automation, analytics, and business workflows.
- Architected managed website and reporting pipelines using Cloudflare Pages, Workers, R2, DNS, static architecture, GA4, DuckDB, Evidence.dev, and repeatable client review / publishing processes.
- Developed AI and automation workflows with n8n for intake, content operations, reporting, publishing, local SEO, and internal business processes.
- Served as an n8n Ambassador and early expert recognized by the n8n team.

Lelander

Senior Full Stack Developer / DevOps

Remote · 2017 – Jan 2024

- Supported production web applications, infrastructure, deployment workflows, and technical implementation across multiple engineering teams.
- Strengthened DevOps practices and delivery reliability for 60+ developers across multiple teams through CI/CD workflows, production support, and troubleshooting.
- Designed and implemented custom CI integrations from scratch that executed hundreds of times monthly, saving 20+ engineering hours per month.
- Delivered full-stack development and production support for healthcare, pharmaceutical, big data, and client-facing web applications.

Freelance / Agency Full Stack Developer

Various Agencies (Perfect Circle, Design by M2, Studio 2108)

St. Louis, MO / Remote · 2008 – 2019

- Delivered custom websites, CMS implementations, web applications, and digital products across frontend, backend, hosting, deployment, and support.
- Created Studio 2108's WordPress production and hosting workflow model, supporting management of 200+ client websites.

Key Projects & Achievements

- **CoachVAS AI Chat Assistant:** Client-facing AI solution for visitor engagement, question capture, and guided business communication.
- **ChamberIndex Automation:** n8n + Svelte system for automated collection, organization, and presentation of local business directory data.
- **Evidence.dev Reporting Pipeline:** Self-hosted analytics platform using CSV/DuckDB, Cloudflare R2, Evidence.dev, and automated PDF generation.
- **Healthcare & Big Data:** Contributed to Kantar Health big data analysis software and Shaquille O'Neal-endorsed BiDil website.
- **AI-native workflow and development practice:** Extensive hands-on use of ChatGPT, Cursor, and agentic coding workflows across automation design, DevOps troubleshooting, CI/CD workflows, documentation, prototyping, and full-stack business systems.

Additional Technical Background (2000 – 2021)

- Founded BunnyGun Games, an independent VR/game development studio. Selected for Oculus Launch Pad (2017) and later served as a paid mentor for Facebook/Oculus VR creators.
- Earlier background includes freelance consulting, PC/network support, university web development, instructional technology, and scientific visualization.

Community & Education

- **Southwest Area Chamber of Commerce** — Board Member, Ambassador, Business Builders Committee (2024–Present). Awarded “New Chamber Member of the Year” 2024. Delivered business education, skills workshops, public speaking, and technology guidance.
- **Community College of Rhode Island** — A.A., New Media Design

- **University of Rhode Island** – Computer Science Coursework (2 years)
- **Certifications:** PC Technician (Staples, 2000), Dell Technician (2007)
